

Research Exchange (ReX)

Smart, simple submission

Submitting a manuscript is often harder than it should be. That's why we created Research Exchange.

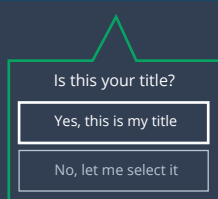

Here's how submitting a manuscript in ReX works:

Upload your manuscript files

ReX **scans your manuscript** and **extracts key information**—no re-typing or copying and pasting needed

Verify the information ReX has identified and confirm any additional details about your manuscript

Review your submission and click **submit**

Submitting through Research Exchange takes a fraction of the time of traditional manuscript submission

What are authors saying?

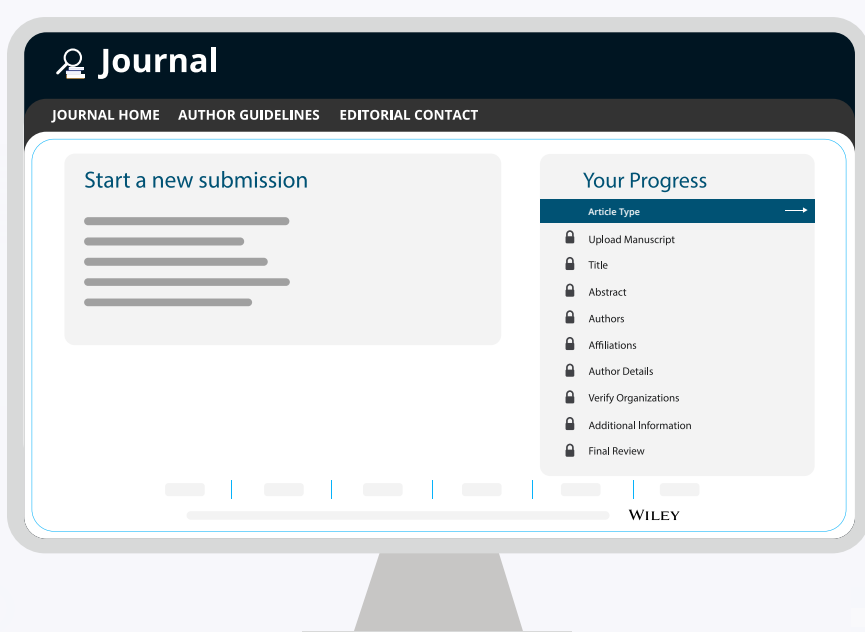

"The easiest submission process I have experienced for any journal."

"Fantastic and hassle-free submission."

"Such a time saver!"
